

## Distance education without borders

**Khmelnyskyi National University** is the biggest higher educational institution in Podillya, which trains specialists in 43 specialities and conducts educational, methodical, scientific work. The University was founded in 1962. Since that time it has transformed from general technical faculty of Ukrainian Printing Institute to Khmelnyskyi National University, which has the highest IV-th level of accreditation. It trains specialists for Ukraine as well as for the whole world.

The tuition is conducted in two languages: Ukrainian and Russian.

Foreigners' and stateless persons' training is carried out according to the Law of Ukraine. Foreign citizens' admission is conducted according to the Regulations on admission and training foreigners and stateless persons in Khmelnyskyi National University.

For registration in the University (admission for the first year studying or transferring from other educational institutions)

foreigners submit the documents to the Selection Committee.

All foreigners can get education in our University for affordable price.

**Education increases Your incomes, expands the outlook and encourages personality development!**

*Dynamic, modern distance learning integrates all existing teaching methods and puts them on a new level.*

**Distance learning** – is a new form of education process organization that is based on students' independent learning principles. Tuition environment presupposes that students remote from the teacher in space and time have the possibility of supporting anytime dialogue by means of telecommunications.

**Distance learning in Khmelnytskyi National University is a  
unique opportunity to get higher education on the newest  
technologies basis**

Each student studies in accordance with the individual plan within distance learning specificity.

Everybody takes the advantage of studying in convenient time and place. Distance learning crosses borders.

**Distance learning >>>**

it is a new form of educational process organization; the distinctive feature is to provide the student a possibility to receive necessary knowledge, using advanced information resources provided by modern information technology and the Internet.

Distance learning information resources – data and knowledge bases, computer, multimedia, educational and supervisory systems, video and audio records, e-libraries, virtual laboratory researches, that form a unique environment for studying,

for obtaining higher education, available to the vast academic audiences. Distance learning is more engaging and effective than the traditional full-time or correspondence forms.

**Features >>>**

We perform:  
Free and full access to information resources of the University;  
The opportunity to study in convenient time;  
The opportunity to study at the student's place of residence;  
The opportunity to use mail systems for on-line communication with academics and peers.

We provide:

Passing exams and tests at the place of residence in the video-conference mode on computer; arrival to the central Institution only for passing state exam and diploma defense; the expansion of the range of people, who have access to the teaching resources;

aid in the development of students skills in self-directed learning in up-to-date information environment.

**Cost >>>**

Tuition fee remains the same throughout the period of study.

The cost of training is 3 times less than full-time training, and 1,5 - than part-time education.

**OUR  
Education is  
YOUR  
professional  
success!**

Foreign students can enter the 2nd and other years of studying with the possibility to recredit finished courses in other University.

**Distance education is a very comfortable and useful thing for you.**

It allows to obtain parallel higher education in Ukraine, with the possibility to recredit courses studied in a foreign University. You can obtain Ukrainian state diploma, while foreign diploma must pass Nostrifikation procedures in Ukraine. Distance education has great social importance, as it enables to fully meet the education needs of the population, and the Internet gives the opportunity for communication between student and academic regardless of their place of residence (location). Examination periods are held in on-line video mode with the help of modern information and communication technologies.
